About Me

I am a passionate and driven individual with a strong curiosity for learning and exploring new ideas. I thrive in environments that challenge me to grow, whether through creative projects, problem-solving, or collaborating with others. I value dedication, resilience, and continuous self-improvement, and I enjoy applying my skills to make a meaningful impact. With a positive mindset and a love for innovation, I am always eager to take on new opportunities and embrace experiences that allow me to expand my knowledge and capabilities.

Skills

- Web Development (Basic)
- Arduino
- RaspBerry Pi
- IoT

Certificates

Introduction to IoT Applications
Rizal Technological University
Sept 2025

Web Development Bootcamp-from HTML to Hosting
Rizal Technological University
Oct 2025

Explaining Object-Oriented Programming Through video games using the source Engine and C++
Rizal Technological University
Oct 2025

Project Experience

Tallybot : A Shopping Cart That Recognizes Products Inside and Calculated Total Cost

4th yr 1st semester Final Project

This project is for our final project for Embedded-system. In this project we used microcontroller, Camera, YOLO and LED light for detection of items and an LCD for display. It

Pawlink : A company website for Automated Pet Feeding & Care

4th yr 1st semester Final Project

This project is for our final project for Cognate 3. In this project we make a actual product of a pet-feeder along with a company website, in which the actual product can be bought from the website as well as the controls of the control feeder can be access in the website remotely.

Aquapalay: An IoT-Enabled Floating Bed system with an AI-driven Decisions Support System for Automated Irrigation, Nutrient Management and Real-Time Monitoring of RC216 Palay

4th yr 1st - 2nd semester (Thesis)

This one is an ongoing Project to be planned to be finished by march 2026. this project is currently at Development and Testing phase. This Project is built to reduce the damage palay when flood occurs but also integration of IoT for Nutrients Monitoring of Palay (RC-216).

POS System : Pet Grooming Services and Shop

2nd yr 2nd semester Final Project

We used c# and window builder on doing this Project, where it includes the transactions history, records, sales, and receipt.

Education

BS Computer Engineering — **2022-Present**
Rizal Technological University
College

Science Technology Engineering and Mathematics (STEM) — **2020-2022**
Dee Hwa Liong Academy
Senior HIgh School

Letter of Intent for Internship (IT Role)

Juan Paolo Dilo
HR Associate
Organization Effectiveness
The Medical City
+246-810-1214

Dear Mr. Dilo,

I am **Gian Carlo A. Gonzalvo**, and I am writing to formally express my intent to apply for an internship in an Information Technology-related role at The Medical City. I am currently a fourth-year Computer Engineering student seeking hands-on experience to complement my academic training and further develop my technical and professional skills. As part of my academic requirements, my internship consists of **300 required hours**.

Through my coursework and academic projects, I have gained practical experience in computer hardware assembly and troubleshooting, system diagnostics, basic networking, and software installation. I have also worked on embedded systems projects, including a hand gesture recognition home automation assistant, which strengthened my problem-solving skills, adaptability, and ability to work effectively in a team-oriented environment.

I am eager to learn in a real-world setting and to contribute to maintaining reliable and efficient IT operations within your organization. I believe this internship will provide valuable professional growth while allowing me to support The Medical City's commitment to quality healthcare services.

This internship application is endorsed and will be noted by my coordinator, Engr. Jasper Mijares, whose contact details are provided below for your reference.

Thank you for your time and consideration. I would be grateful for the opportunity to be considered for this internship.

Sincerely,

GIAN CARLO A. GONZALVO
